METALANDZ

Metalandz is a play-to-earn gaming platform based on the Binance Smart Chain.

Our vision is to offer a deeply immersive platform where players can create their own non-fungible tokens (NFTs) and rewarding their participation with our utility token – METAZ by playing PolyJungle.

METALANDZ aims to bring blockchain into mainstream gaming, attracting both crypto and non-crypto game enthusiasts by offering the advantages of true-ownership, digital scarcity, monetization capabilities, and interoperability.

We strongly believe that digital scarcity will have the most important role in the future of gaming.

This is the way for a crucial turning point, a mass adoption of NFTs, Blockchain and Cryptocurrencies.

UP POLYJUNGLE

POLYJUNGLE

POLYJUNGLE by **METALANDZ** is the first game of the platform and will be the first step in the development of the **METAJUNGLE**.

This entertainment process will create the foundations of **METAJUNGLE**, which will be launched at the beginning of Q1 2023.

METAJUNGLE

POLYJUNGLE BOTZ

The POLYJUNGLEBOTZ are a poly version of the JUNGLEBOTZ, only mintable on our NFT platform if you own already a JUNGLEBOTZ, having like this a 1:1 version of your asset that can be used in the POLYJUNGLE game, giving the players an unique user experience. The POLYJUNGLEBOTZ are all free to mint by the whitelist addresses (JUNGLEBOTZ owners).

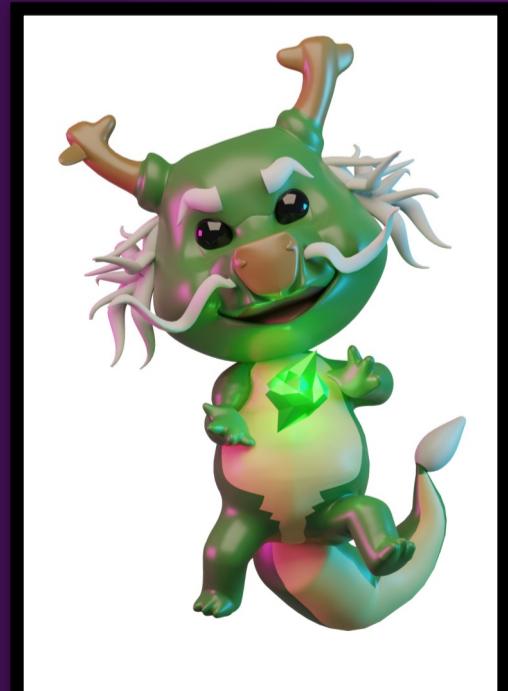

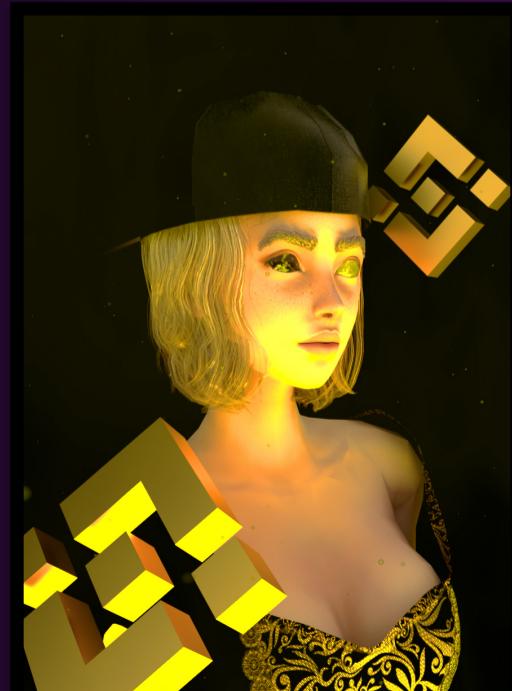

OPEN JUNGLE

OpenJungle is a marketplace for Non-Fungible Tokens and Semi-Fungible Tokens.

With OpenJungle we want to create a high quality marketplace, safe and simple to use. Our target is to make easy for our users the whole minting process of their NFTs and the creation of their virtual gallery.

OpenJungle will have a signed artists dedicated section, where the users will find artists and musicians from all around the world.

METAZ

METAZ is an essential part of Metalandz platform and we are working on establishing key mechanics that makes it intrinsically tied to the Metalanz platform and its value. METAZ is a BEP-20 utility token built on the Binance Smart Chain that serves as the basis for transactions within Metalandz, and has the following uses.
